

# MANUFACTURING SUPERVISOR

Europe & Asia

Publication Date: 2017-03-01

**Ref.:** 17-001

**Sector:** Hydro Power Plant

**Education Level:** Technician degree

**Location:** Europa&Asia

**Duration:** One Year

**Start:** 01.04.2017

**Kind of Contract:** Offshore contract

**Conditions:** Upon agreement

## Mission description:

- Analyze the data coming from the industrial engineering about the methodology of fabrication in consistency to the existing production means and tools
- Help the writing of all the technical documentation for the quality for the mechanical welding part as the welding book
- Support and control all the mechanical welding processes used in the factories taking into account the local practices and manufacturing processes commitments
- Be the interface about mechanical welding between SYGMA and COSTUMER
- Analyze the methodology and all documents from industrial engineering department for this local manufacturing
- Estimate and report to SYGMA the technical risks linked to the local manufacturing versus expected results in term of quality and delivery time
- Participate in the management of tools and equipment necessary for the activities
- Weekly Report to SYGMA about the local manufacturing activities regarding mechanical welding topics

## Responsibilities:

- Set daily/weekly/monthly objectives and communicate them to employees
- Plan, organize workflow by assigning responsibilities and preparing schedules
- Constantly measure and monitor fabrication performance and efficiency
- Oversee and coach employees
- Ensure the safe use of equipment and schedule regular maintenance
- Local client's organization
- Submit reports on performance and progress
- Identify issues in efficiency and suggest improvements

## Candidates Requirements:

- Degree in a Technical or Engineering in welding manufacturing
- Knowing of traditional production means and machines for the manufacturing of this kind of welded components
- Professional experience of fifteen years acquired in mechanical welding manufacturing
- Organization and leadership abilities
- Be responsible, follow-up and respect the commitments
- Be rigorous in the analysis and the action plans
- Be precise, complete and transparent in the reporting
- Self-motivated with a results driven approach
- Problem solving skills
